

## **CONSULTING GEOTECHNICAL TECHNICIAN JOB SPECIFICATION**

We are a national Site Investigation, Geotechnical and Environmental Consultancy working within the construction industry, based in Preston. Due to our increasing workload, we may require a Geotechnical Technician to work within our consultancy company providing assistance in the production of technical reports.

The main aspects of the job are as follows:

- Assisting the Principal and Senior Engineers in the production of geotechnical and environmental reports.
- Logging soil strata and rock cores to BS5930 and Eurocode 7.
- Drafting and checking borehole record sheets.
- Preparing and checking laboratory test results sheets
- Preparing and checking in-situ test results sheets using in-house programmes e.g. CBR tests, plate bearing tests, soakaways, etc.
- Preparing and producing figures, location plans, sections etc. for reports
- Preparation of factual reports
- Assisting Engineers in the preparation of factual data for interpretive reports.
- Leading to the preparation of Interpretive reports with experience gained.

Full training will be given.

We are a friendly family run group of companies with offices throughout the country. The position is based in Preston at our head office, close to the University and city centre, with our own free parking which provides a pleasant working environment.

The position would suit someone with a geotechnical / geological background, preferably with BTEC qualifications or similar, who is able to work on their own initiative but within a team environment and communicate effectively with Clients.

The main conditions of the employment are:

- Full time contract
- Monday to Friday.
- 37.5 hrs per week
- 24 days holiday per year plus bank holidays

For full details of our company, see our web site [www.subsurface.co.uk](http://www.subsurface.co.uk).

If you would like to join our team, please email your CV and current salary to [jobs@subsurface.co.uk](mailto:jobs@subsurface.co.uk) with the job position, Preston Office and your name as the email title.
