

GEOTECHNICAL ENGINEER JOB SPECIFICATION

This is an excellent opportunity to join a Geotechnical and Environmental Consultancy within a highly regarded, long established, specialist Site Investigation group of companies with offices nationwide.

Sub Surface Consultants Limited is the specialist geotechnical and environmental consultancy for the Sub Surface group and is looking for an ambitious Geotechnical Engineer to join our Consultancy team based at the Head Office in Preston, working on a wide range of projects helping you become Chartered.

The successful candidate would ideally have:

- B.Sc. / M.Sc. in a Geotechnical related subject.
- Approximately 2 - 7 years experience in geotechnical site investigation, design, consultancy and report writing on a wide range of projects in the UK.
- Fully conversant with and able to log soils to BS5930/Eurocode 7.
- Experience of geotechnical report writing and design including foundations, piling, vibroflotation and dynamic compaction etc. slope stability, retaining wall and earthworks assessment, analysis and design. Geological and mining investigation, assessment and design.
- Experience of trial pitting, logging soils and rock strata, in-situ testing etc.
- Some experience of environmental issues including phase 1, 2 and 3 investigations and risk assessments, options appraisal, design of remedial measures and validation of contaminated land, landfill gas etc.
- Full UK drivers licence.

The main responsibilities of the successful candidate would be:

- Providing geotechnical expertise and advice to the Group's area offices on a wide range of projects.
- Producing Technical Reports: Phase 1 Desk Studies, Phase 2 Intrusive Geotechnical and Environmental Reports, Phase 3 Remediation Statements, Phase 4 Validation Reports on a wide range of projects.
- Logging of soils to BS5930/Eurocode 7
- Occasional site work when required (trial pitting, in-situ testing, supervising)
- Liaising with and providing geotechnical consultancy advice to Clients.
- Designing investigation and remediation schemes.
- Peer review of external reports.

Sub Surface is a long established, highly respected company within the industry, looking to expand in size and the services they offer and this position would provide an excellent opportunity for them to progress their career.

The main conditions of the employment are: full time contract, Monday to Friday 8:30am - 5pm (37.5 hours per week) and 24 days holiday per year plus bank holidays. The majority of our site investigation work is supervised by our Contract Managers, however occasional site work will be required with early starts getting to site of 8am.

For full details of our company, see our web site www.subsurface.co.uk.

If you would like to join our team, please email your CV and current salary to jobs@subsurface.co.uk with the job position, Preston Office and your name as the email title.
